Welcome

to the **COMPRESSORTECH2 HYDROGEN SUMMIT!**

**LEARN
NETWORK
SHARE
DEBATE
LEAD**

The quest for clean energy solutions has never been greater from stakeholders at every level, and the US government alone has given hydrogen production a massive boost through unprecedented tax credits. Investment in hydrogen-related projects across the USA is in the billions.

Hydrogen is seen by many as the White Knight to decarbonize the gas industry in the form of blending. Hydrogen usage is also being driven by industries including power generation and Transportation.

The blending and compression of H₂ safely and efficiently presents big challenges to equipment manufacturers, midstream operators, producers and packagers.

The goal of the Compressortech2 Hydrogen Summit is to bring leaders together to network and share knowledge, successes and challenges relating to hydrogen blending, equipment and compression.

Join us for this unique one-day event with keynote, round table and multiple seminars from leaders in hydrogen.

Agenda

- Hydrogen testing on existing equipment
- Hydrogen compression equipment and technology
- Hydrogen blending
- Green hydrogen and compression
- Blue hydrogen, carbon capture and compression
- Hydrogen and gas turbines

Submit a paper

If you are interested in providing a speaker, please email: Keefe.borden@khl.com

Why sponsor?

- Meet with packagers who want to learn more about hydrogen compression
- Meet with leasing companies
- Talk with leading mid-stream operators and producers
- Meet face to face with equipment buyers
- Associate your business & brand with clean energy
- Prominent branding and tabletop positioned in networking area
- Sponsors get on-going promotion pre-event, during and post-event
- Networking includes lunch and coffee breaks during the conference and drinks reception
